MORE THAN JUST WEBSITE MEASUREMENT TOOLS, GOOGLE ANALYTICS PROVIDES POWERFUL INSIGHTS TO WEBSITES OF ALL SHAPES AND SIZES.												
PRODUCT			METRICS			REPORTS			FEATURES			

Each Element Means Something

Accounts	UA	All that is Google Analytics is contained in an account
AdSense Reports	As	How much money did your site make and how did you make it?
Advanced Segments	Av	Easily view how specific visitor segments perform on your site
Advertising	O	Performance of your website advertising. Tribute to David Ogilvy
AdWords Reports	Ad	AdWords within Analytics
Analytics API	Ap	Programatically access Google Analytics, create greatness
Assisted Conversions	Ac	Discover traffic sources that contribute to goals and sales
Asynchronous	A	Cutting edge JavaScript code that Tracking Code tracks visitors without slowing you down
Attribution Modeling	Am	Give credit where credit is due
Audience Reports	Au	Discover key properties about your audience
Behavior Reports	Be	Visitor Engagement, Frequency, Recency and Newness
Bounce Rate	Br	Who came, puked and left your site?
Campaigns	Ca	Traffic that you drive to your site with proper tagging
Change Log	Ch	Who changed what and when did they do it?
Clicks Report	Cl	Report on actual costs to actual revenue for actual ROI analysis!
Content Experiments	Ex	Google Website Optimizer's stylish new cousin
Content Reports	Cn	Content is king of the jungle

Google Webmaster Tools Reports

Beautiful (and Increasingly More Accurate) Search Data!

The screenshot shows the Google Search Console interface. At the top, the primary dimension is set to 'Query' and the secondary dimension is 'Google Property'. An orange dashed box highlights the top 10 queries and their performance metrics. Above the table, an orange callout box contains the text 'Beautiful (and Increasingly More Accurate) Search Data!'. Three orange arrows point to the 'Impressions', 'Clicks', and 'CTR' columns. The table lists the following queries and their metrics:

Query	Google Property	Impressions	Clicks	Average Position	CTR

Setting Up Google Webmaster Tools

This report requires Webmaster Tools to be enabled.

Set up Webmaster Tools data sharing

Set Up Webmaster
Tools Data Sharing

What is Webmaster Tools?

Webmaster Tools is a free product that provides data about your site's performance in Google search.

Enabling Webmaster Tools data within Analytics

Once you connect a site you own in Webmaster Tools to your Analytics property, its data becomes visible in your Search Engine Optimization reports. You can visit the Property Settings page in Analytics account management to change which of your Webmaster Tools sites' data you wish to show, and control which views on your Web Property have access to view the data.

How to use Webmaster Tools data within Analytics

Webmaster Tools provides data about what users see in Google search results before they decide to click to your site (or some other site). You can use this data to identify opportunities and prioritize development effort to increase the number of visitors to your site. Examples:

- Identify landing pages on your site that have good clickthrough rates (CTR), but have poor average positions in search results. These could be pages that people want to see, but have trouble finding.
- Identify search queries (keywords) for which your site has good average positions, but poor click through rates. These are queries for which your pages get attention and improved content could lead to more visitors.

Edit Webmaster Tools Settings

In-Page Analytics

Use enhanced link attribution

- ☐ Enhanced link attribution allows us to better track links on your page, but requires a small change to the tracking code. Follow these instructions to setup enhanced link attribution on your site: [How to setup enhanced link attribution on my site?](#)

Start In-Page Analytics in

- ☒ Embedded mode (recommended)
☐ Full view mode

Use of full view mode is recommended only if your site has trouble loading in embedded mode.

Webmaster Tools Settings

Webmaster Tools site optional ?

If your property is also a verified website in Webmaster Tools, and you are the owner, you can associate your Webmaster Tools data here. Google Analytics will then be able to display some of that data in some reports.

Demographics and Interest Reports

Enable

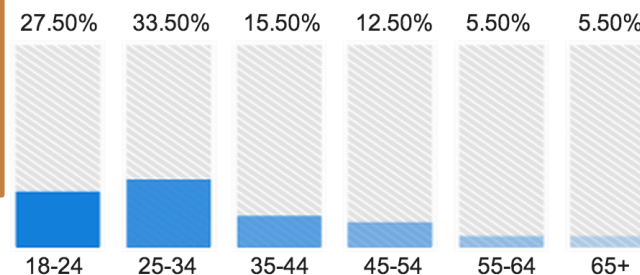

Enable These
and Update Your
Tracking Code
To include dc.js

The Demographics and Interest Reports are available along with new Age, Gender, and Location reports.

- They allow you to better understand your visitors and their characteristics so you can target ads on the Google Display Network.
 - These are the same demographics and interest reports that you can use to target ads on the Google Display Network.
 - Not all of your visitors may have demographics associated with them, so these reports may only represent a subset of your visitors and may not be representative of your overall site composition.
 - [Learn more](#) about how Google determines visitor demographics.
 - [Learn more](#) about how Google determines visitor interest categories.
 - Before enabling Demographics and Interest Reports you may need to update your privacy policy according to [this policy](#).
- [Learn more](#) about the new reports.

DASHBOARDS

Not Provided Kit

NOT PROVIDED KIT

(For Google Analytics)

Download The Free Kit

Since October 2011, Google has gradually hidden away data about the keywords used by people to find your site.

The "Not Provided" Kit is a set of simple add-ons for Google Analytics (put together by me – @danbarker) to help you understand what's happening now that data is absent. It won't fix the problem, but it may bring other insight around 'not provided' visits.

Kit Contents:

1. Your Current Percentage: A single-chart dashboard showing your current 'not provided' percentage (ie. how much open data remains).
2. Full Dashboard: A full dashboard of trends for 'not provided', including graphs, metrics, and breakdowns by browser, device, etc.
3. Detailed Report: A more detailed custom report showing full landing page info for not provided traffic.
4. 'Not Provided' Segment: An advanced segment allowing you to see any Google Analytics reports for *just* 'not provided' traffic.
5. 'Keyword Known' Segment: An advanced segment showing any report *only* where Google organic keyword data was known.
6. A 'Not Google' Segment: This 'Non-Google' organic search segment shows you data only where you *do* have perfect keyword data from other search engines that you can act on.

» **Install the Google Analytics 'Not Provided' Kit Now.**

(Click the above link to add all/some of the 6 add-ons to any Google Analytics account)

Not Provided Kit: <http://notprovidedkit.com/>

Google Analytics Gallery

The screenshot shows the Google Analytics Solutions Gallery interface. At the top, there's a header with the Google Analytics logo, 'Solutions Gallery', a home icon, and a search bar labeled 'Search for solution'. Below the header, a section titled 'Crowd Source Google Analytics Insights.' contains a paragraph explaining the gallery's purpose. To the right of this text is an illustration of a computer monitor displaying various analytics charts. Below the text are two buttons: 'CREATE' (in red) and 'Browse'. A 'Recommended' section follows, displaying six featured solutions in a grid. Each solution includes a thumbnail image, a title, author information, a star rating, and an 'Import' button.
