

START YOUR SEO IN 10 SIMPLE STEPS

Get more traffic and improve your website's
position in Search Engines

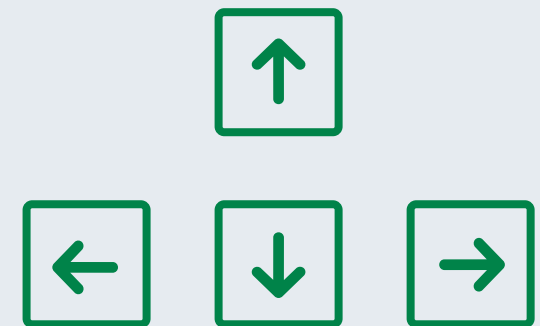

1. Make a site with a clear hierarchy

- Plan your website's structure to make it more accessible for search engines
- Connect every page with at least one text link
- Plan natural user flow from general page to pages with more specific content

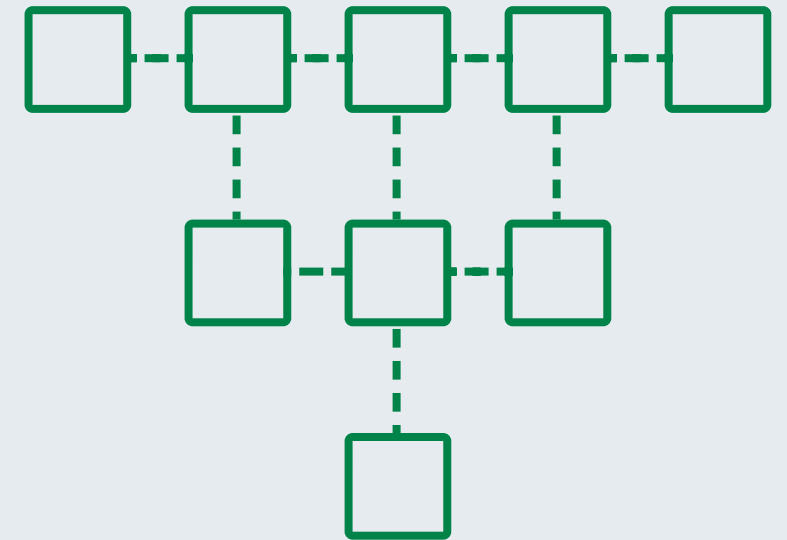

2. Make your webpage easier to navigate

- Create a website for users, not for search engines
- The better the navigation, the better overall onsite user experience will be
- Use mainly text links for navigation

3. Prepare a sitemap

- Prepare a HTML sitemap, to get better coverage of your site
- Use a xml sitemap file to maximize search engine accessibility

4. Not found page

- Create a custom 404 page
- Improve your users' experience and guide them back to the homepage or page they might be looking for

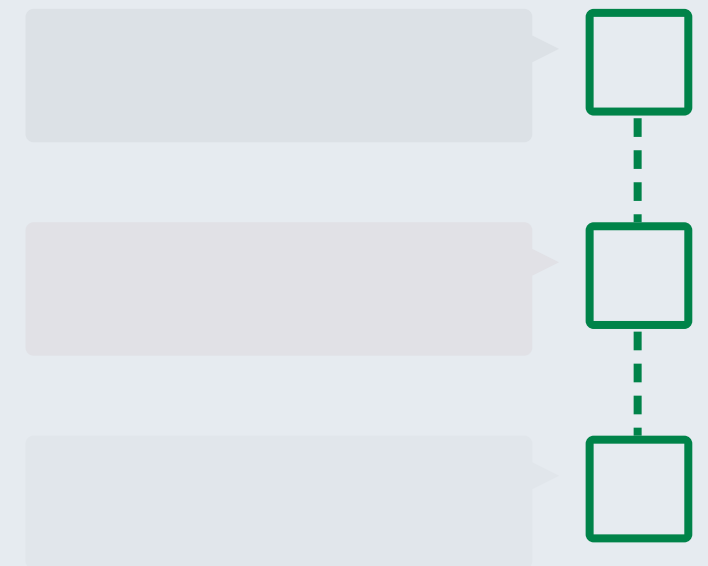

5. Page titles and meta tags

<meta[★]>
<title>

- Use unique and accurate titles for your webpages
- Try to summarize the page's content in the title
- Add a description of your page in a meta tag

6. Describe structure

- Try to make descriptive categories
- Use descriptive URL links
- Aim for short phrases in URL links
- Description of your links and site structure should be relevant to your content

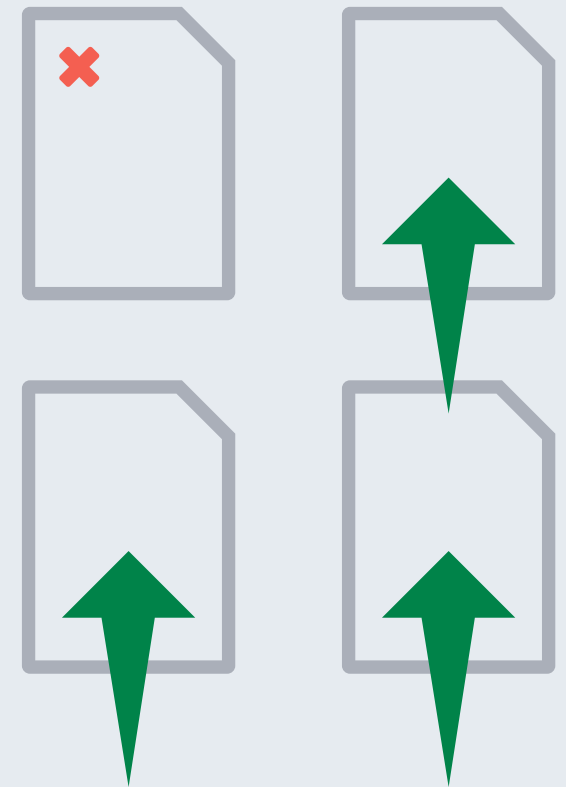

7. Describe your images

- Use “alt” attribute to describe your images
- Focus on brief and accurate image text description

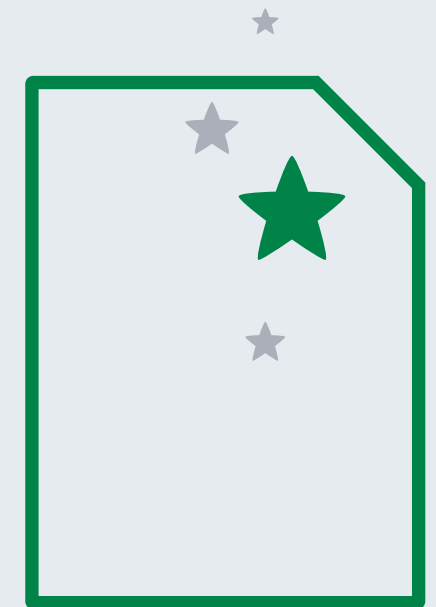

8. Robots.txt and "nofollow" attribute

- Specify which directories can and can't be visited by search engine crawlers
- Prevent spam or irrelevant posts or comments to be indexed

9. Make your content rock!

- Small improvements = major impact on website's ranking
- Be unique
- Focus on the topic
- Engage your readers

10. Promote

- Promote your efforts with Social Media
- Engage topic related communities
- Avoid spamming on other sites
- Don't take shortcuts (black hat) to achieve higher rankings

Why SEO measurment is important

- Know your website's position in Search Enignes
- Identify the most profitable keywords
- Ability to track SEO results, anlyze data and achieve better results
